Using regexes in Java

1/1 point (graded)

Write the shortest regex you can to remove single-word, lowercase-letter-only HTML tags from a string:

```
String input = "The <b>Good</b>, the <i>Bad</i>, and the <strong>Ugly</strong>";
String regex = "TODO";
String output = input.replaceAll(regex, "");
```

If the desired output is `"The Good, the Bad, and the Ugly"`, what is shortest regex you can put in place of TODO? You may find it useful to run this example in the Online Java Tutor.

| `</?[a-z]+>` |

✔ **Answer:** </?[a-z]+>

Explanation
Run the example in Online Python Tutor to see how it works.
